

Day 5 - Facilitator's Tips

1. They did it! Now it's time to showcase. Students may be unsure of how to showcase all their comic work with the pictures of their invention; they can put it all together in a Google Doc or a Word document.
2. If students made their invention storyboard through Scratch, make sure they can publish their work online.
3. When they are done, please ask them to register and upload their work to the [MIT Full STEAM Ahead](#) website. Students must be 13 years or older to post on the website. If they are 12 or younger, a caring adult needs to register and post for them.
4. Congratulate your students! They're now inventors!
