

Socrative

Online Assessment

[Socrative](#) is a free, smart student response system. Their apps work on tablets, smartphones, iPod Touch, laptops, and others. Quizzes can be true/false, multiple choice, graded short answer, or open-ended short response. See your students' responses in an Excel file or view online as a Google spreadsheet. Activities can either be teacher-paced (for use during a classroom discussion) or student-paced (for use as a more traditional class-end "exit ticket" or quiz). There's also a gaming element that the "Space Race" feature can set up—a quiz with teams of students competing against one another.

In the Classroom (K–12)

- In any curriculum area, ask open-ended questions and display student responses with your projector or interactive whiteboard.
- You may also choose to use one of their ready-made activities as exit tickets, thoughtful questions, or games.

This site has the following features:

- Requires registration/log-in (WITH email).
