

Flippity

Create Interactive Digital Manipulatives, Activities, and Tools

[Flippity](#) is a free website that allows you to turn Google spreadsheets into interactive digital manipulatives, activities, and tools. The site offers a wide range of ready-made templates that you can copy and customize. Once you have adapted it to meet your needs, you simply publish the sheet to the web and share the auto-generated link. Some of the more popular templates include a quiz show generator, a random name picker, a scavenger hunt activity, a word search generator, a crossword puzzle maker, and a Mad Libs creator. Flippity now offers a [more streamlined version](#) for teachers who do not want to create and save a spreadsheet. This allows you to simply paste in your content and click the tool you want to use.

In the Classroom (Grades K–12)

- Flash cards
- Quiz show
- Random name picker or group generator
