

Bitly

Create Customized Short URLs

[Bitly](#) is a website that offers free URL shortening. This allows you to take a long, complicated web address and shorten it into one that is easier to remember or type in manually. Without an account, you can create a randomized short URL with one click on the homepage. If you create a free account, you can customize and manage your URLs. While there are premium accounts available, you can get up to 1,000 customized URLs per month with the free version.

In the Classroom (Grades K–12)

- Post shortened URLs on print documents for easier access.
- Post shortened URLs on presentations for viewers to more easily type or write down.
- Post shortened URLs on social media.

Site Features

- Create random short URLs without an account.
- Create up to 1,000 customized URLs with a free account.
- Manage URLs on the dashboard.
- Monitor the number of clicks for 30 days through the dashboard.
