

TeacherMade

Turn Digital Documents Into Auto-Scoring, Online Activities

[TeacherMade](#) is a free website that allows you to convert paper documents into interactive, digital activities. Upload PDFs, images, or Word documents to the site, and then add the interactive elements. Insert text boxes, multiple-choice buttons, matching fields, image hot spots, true/false questions, and more. You can upload usernames or have students sign in with their Google accounts. Student responses are auto-scored, so you can allow students to get instant feedback on their performance. Scores and usernames are also recorded in the teacher dashboard for convenient review.

In the Classroom (Grades K–12)

- Create self-scoring practice activities.
- Turn worksheets into immediate, formative feedback activities.
- Use for formative assessments.
- Check for understanding.
- Label or choose hot spots on an image.
- Save time converting print handouts to digital activities.
- Use as a quiz or test.

Site Features

- Accepts PDFs, images, and Word documents.
- Students can sign in with Google or via an uploaded list of usernames.
- Activities are self-scoring.
- Student scores are recorded on the teacher dashboard for each activity.
- Most question types are supported (short-answer, fill-in-the-blank, checkbox, dropdown selections, essays, multiple-choice, hot spots, matching, true/false, numbers, fractions, algebraic expressions, and more).
- Share with students via Google Classroom or with the activity link.
