Clipchamp

An Online Video Recording and Editing Studio

Clipchamp is an online video recording and editing studio. Although there is a paid version, the free version will likely meet most classroom needs. You may create a project from scratch or begin with a template. With the free plan, you can combine and edit your own video, image, and audio files, as well as add titles, filters, and visual effects. You can also add voice-overs, record your screen, or record from your webcam. There are handy options for importing media from your computer, phone, or online drive. When you are finished, you can export as many videos as you like in 480p (SD) resolution without a watermark. If you need higher-resolution files, you will need to upgrade to the premium account. To access your project on multiple devices, you will either need to upgrade or be sure that you are storing your clips in Box or Google Drive.

In the Classroom (Grades 4–12)

- Create teach-back videos.
- Explain a project or concept with a screen cast.
- Document student learning.
- Tell a story (personal, historical, or hypothetical).
- Record personal or peer feedback.
- Create a video newsletter for your classroom.
- Produce a classroom newscast.
- Narrate a slideshow.
- Produce a documentary.
- Create a how-to video.
- Record a dramatization of something learned.
- Role-play.
- Record a video "show and tell."
- Reflect on a project.
- Create a book trailer.
- Create an advertisement.
