

Frayer Model Template

Name: _____ Date: _____

The diagram is a large square divided into four quadrants by a vertical and a horizontal line. In the center of the square is a large circle. The circle's diameter is equal to the width of the square, and its center is at the intersection of the vertical and horizontal lines. This layout is used for the Frayer Model, where each quadrant typically contains a different component of a concept: a definition, a list of characteristics, a list of examples, and a list of non-examples.
