Flip
(formerly Flipgrid)
Video Discussion Tool

Flip is a free video discussion tool with capabilities for sharing student responses through video. Groups allow users to create topics and gather student responses. Students may access your Flip group using the access code you provide when sharing your topic.

In the Classroom (Grades K–12)

- Create prompts for students to respond to about anything and everything.
- Challenge students to reflect on their learning at the end of a unit, research project, or literature circle.
- For professional use, create a topic for peers to discuss. Ideas may include discussing concerns with implementing new technology or curriculum. Have fellow teachers share articles of interest from professional journals.
- Use Flip to implement a book talk on a topic of interest.
- Use Flip as follow up for a flipped assignment. Ask students to explain what they understand and/or still don't understand about a concept. You can review the responses before the next day's class.
- Use it as an exit slip before students leave class or as a warm-up at the beginning of class (what do they remember about the lesson taught yesterday).

This site has the following features:
- Parent permission is advised before posting student work created using this tool.
- Requires registration/log-in (WITH email).
- Flip is now completely free. Click here to view details and features.
- Products can be embedded.
- Products can be shared by URL.
- Multiple users can collaborate on the same project.
- Includes teacher tools for registering and/or monitoring students.
